1 BUILD A LIST

Pick a fleet, click ships in. Points are totalled and the list restrictions — section counts, ratios, squadron sizes — are checked as you go. Every check shows the sentence from the book it came from.

2 PRINT THE CARDS

One A4 card per ship, two to a page. Damage boxes, critical hit table, armament with fire arcs and options as tick boxes. Play off the card, not the book. Cards also download as an editable file.

3 CHECKED AGAINST SOURCE

Every value is pulled from Fleets WiP v0.36 and Rulebook v1.10, then compared line by line against the source PDF. The page number is on every card, so you can always look it up yourself.
