COBRA CLASS DESTROYER

Imperial Navy | Escort | pg. 84

PTS

SPEED	TURNS	SHIELDS	ARMOUR	TURRETS	LEADERSHIP
30 cm	90°	1	4+	1	

SQUADRON STATE

1 box / ship

BUILT	DESTROYED	REMAINING

ESCORT: one unsaved Hit destroys the ship; a Critical Hit destroys the escort outright.

LOADOUT / OPTIONS

X = taken

- [x] **Cobra Class Destroyer / base** — 30 /ship
  Entry cost in Imperial Navy — Gothic Sector. Everything ticked below adds to it.
- [ ] **Squadrons can carry experimental long range detection gear** — see text
  This doubles the Leadership test bonus for enemy contacts (ie, enemy on special orders) from +1 to +2 but removes the squadron's weapons batteries (like the 24th Destroyer Squadron Widowmakers). Can only be taken by escort squadrons where more than half the escorts are Cobras, and all the Cobras in the squadron must take the refit. Only Imperial escort squadrons may take this refit, not pirates, Chaos renegades, etc.

ARMAMENT

* = starred rule or option below | arc wedge = darken the one used

Armament	Range/Speed	Str/FP	Arc
T Prow torpedoes	30 cm	2	
G Weapons battery	30 cm	1	

SPECIAL RULES / UPGRADES

- REPAIR: End Phase, D6 / remaining Hit; 6 = 1 crit; blast contact 1/2 dice.

T * Port torpedoes	30 cm	2D6	
T * Starboard torpedoes	30 cm	2D6	
G * Aft gunz battery	45 cm	2D6+6	

SPECIAL RULES / UPGRADES

* Ork Gunz: ordinary weapon batteries; roll their printed random Firepower each time they fire. (Fleets p. 360)
* Ork Torpedo Launchas: roll the printed salvo Strength each time they fire; ships in a squadron may not combine salvoes. (Fleets p. 360)
* Heavy Gunz: roll as weapon batteries without the range column shift; every hit causes 2 Hits. (Fleets p. 360)
* Fighta-Bommas: 25 cm fighter/bombers; each attacks a ship with D3 instead of D6. Surviving markers add +1 attack each after turrets, and some may forgo attacks for extra suppression. Variable carrier capacity is re-rolled each Ordnance phase. (Fleets p. 359)
* Boarding Torpedoes: resolve a Hit & Run attack instead of normal torpedo damage when they hit. (Rulebook p. 78)

- Orks: Leadership is reduced by 1; All Ahead Full needs no Command check and adds 2D6 cm; +1 in boarding actions. (Fleets p. 358)
- REPAIR: End Phase, D6 / remaining Hit; 6 = 1 crit; blast contact 1/2 dice.

CRITICAL DAMAGE (2D6) — through shields: 6 → 2D6 · 5 trackers / result

G * Keel weapons battery	45 cm	8	
L * Prow pulsar lances	45 cm	2	
L * Prow pulsar lances	45 cm	2	

SPECIAL RULES / UPGRADES

* Eldar Ordnance: turrets hit it only on 6. Torpedoes re-roll their first failed hit; fighters have a 4+ resilience save and bombers re-roll attacks. (Fleets p. 304)

* Eldar Weapons Battery: treat every target as Closing on the Gunnery table. (Fleets p. 304)

* Pulsar Lance: hits as a lance on 4+; after a hit, roll again until it misses or that shot has caused 3 hits. (Fleets p. 304)

- Eldar movement: turn to any facing, then use the sunward value of the three-part Speed; move again in your Ordnance phase. No AAF, Burn Retros, CTNH or ramming. (Fleets pp. 302-303)
- Holofields: one right column shift against Gunnery; against other attacks save each hit on 2+, placing a Blast Marker for each save. (Fleets pp. 303-304)
- CRITICAL: Every Hit causes critical damage on 4+; roll 2D6 on the Eldar table.
- REPAIR: End Phase, D6 / remaining Hit; 6 = 1 crit; blast contact 1/2 dice.

1 2 3 4 5

CRIPPLED from box 6

6 7 8 9 10

CRIPPLED: Speed -5 cm; Bio-plasma and Pyro-acid 1/2; Spores unchanged; no Torpedoes, Attack Craft, Claws or Tentacles.

LOADOUT / OPTIONS — X = taken

x	**Hive Ship / base** Entry cost in Tyranids — Hive Fleet. Everything ticked below adds to it.	200
x	* **Prow — Boarding torpedoes**	+25
x	* **Thorax — Launch bays**	+20
x	* **Port/starboard set 1 — Launch bays**	+20
x	* **Port/starboard set 2 — Launch bays**	+20
x	* **Port/starboard set 3 — Launch bays**	+20

ARMAMENT — * = starred rule or option below | arc wedge = darken the one used

Armament	Range/Speed	Str/FP	Arc
X T * Boarding torpedoes	15 cm	8	
X O * Launch bays	20/15	2 Sqn	–
X O * Port/Starboard Launch bays	20/15	1/1 Sqn	–

SPECIAL RULES / UPGRADES

- Hive ships are large and cumbersome, and hence may not use Come to New Heading special orders.
- Any ship attempting to fire upon a hive ship suffers -1 Ld when attempting to ignore closer targets if a squadron containing only Escort Drones is in base contact with the hive ship as well as in between the hive ship and the firing vessel.

* Pyro-acid Battery: fires as a weapon battery; every critical hit also causes an additional Fire critical. (Fleets p. 420)

* Feeder Tentacles: once per turn on contact roll D6; 1-3 = that many Hit & Run attacks, 4-6 = 1 Hit plus one Hit & Run. No attack while Crippled. (Fleets p. 419)

* Massive Claws: on contact roll 2D6 per pair; each 4+ causes 1 Hit ignoring shields. Two hits grapple the target. No attack while Crippled. (Fleets p. 420)

* Bio-plasma: hits like a lance on 4+, ignores shields and cannot be shot down by turrets; holofields and reactive saves still work. (Fleets p. 419)

* Boarding Torpedoes: resolve a Hit & Run attack instead of normal torpedo damage when they hit. (Rulebook p. 78)

* Tyranid Launch Bay: only fighters (20 cm) and assault boats (15 cm); the fleet may have twice its launch-bay capacity in attack craft. A Crippled bio-ship cannot launch ordnance. (Fleets p. 424)

- Synaptic control: a Hive Ship may test to override Instinctive Behaviour within 45 cm. Otherwise follow the Instinctive Orders flowchart; navigation uses Ld 10. (Fleets pp. 416-418)
- Tyranid shooting: target the nearest enemy; Vanguard Drones highlight all targets within 15 cm. Boarding value is doubled and roll 2D6, taking the higher. (Fleets p. 418)
- Spores: each cyst supplies one replenishing shield and one turret. Blast Markers degrade their ordnance roll to 6+; spores may fire at torpedoes and attack craft in the same phase. (Fleets pp. 421-422)
- REPAIR: End Phase, D6 / remaining Hit; 6 = 1 crit; blast contact 1/2 dice.

TYRANID CRITICAL DAMAGE (2D6) — through shields: 6 → 2D6 · 5 trackers / result

2 SPORE CYSTS OFF	**3 STARBOARD** OFF	**4 PORT** OFF	**5 PROW** OFF	**6 THORAX +1** OFF
7 HEAVY WOUND +1/turn until fixed	**8 VENTS +1** NO TURNS	**9 SYNAPSE** NO HIVE OVERRIDE	**10 SPORES OFF*** PERMANENT	

11 Severe Wound +D3 **12 Massive Haemorrhage +D6; bio-plasma splash**

* result 10 cannot be repaired; result 12 also attacks another target within 2D6 cm.

DAMAGE

tick per Hit

1 2 3 4 5 6

CRIPPLED from box 7

7 8 9 10 11 12

CRIPPLED: Speed -5 cm; weapons and Turrets 1/2; Star Pulse off; Portals 1/2 (round down).

LOADOUT / OPTIONS

X = taken

- [x] **Cairn Class Tombship / base** — 500
  Entry cost in Necrons — Harvest Fleet. Everything ticked below adds to it.
- [x] **A single tombship may be upgraded to carry a Sepulchre for +50 points** — +50
  There is no requirement for a Necron fleet to include a Sepulchre and it is actually quite normal for them to consist of Scythes supported by Jackals.

ARMAMENT

* = starred rule or option below | arc wedge = darken the one used

Armament	Range/Speed	Str/FP	Arc
G * Lightning arc	30 cm	20	
P * Star pulse generator	20 cm	1/enemy	
G * Gauss particle whip	45 cm	6	
G * Portal	10 cm	3	

SPECIAL RULES / UPGRADES

* Lightning Arc: weapon battery; all targets count as Closing, holofields cause no right shift, and Firepower may be divided among its fire arcs. (Fleets p. 400)
* Star Pulse Generator: one attack against every non-Necron target within 20 cm; ordnance is hit on 4+. No use while Crippled or on any Special Order. (Fleets p. 400)
* Gauss Particle Whip: fires as a lance; a natural 6 to hit ignores shields, holofields and similar saves. (Fleets p. 400)
* Portal: grants the printed number of 10 cm Hit & Run attacks. It works on Special Orders; halve it while Crippled or Braced. (Fleets p. 401)

- Reactive Hull: printed save replaces Brace; Brace improves it to 2+ but Armour becomes 4+. Immune to damage, Leadership and movement modifiers from flares, radiation, gas and Blast Markers. (Fleets p. 402)
- Inertialess Drive: AAF adds D6 x 10 cm and permits one turn per 20 cm travelled. A Necron may fade out automatically at the end of its Movement phase. (Fleets p. 402)
- REPAIR: End Phase, D6 / remaining Hit; 4+ = 1 crit; blast contact 1/2 dice.
